

# AI-Powered Underwriting Triage for Smarter, Faster Decision-Making

## Key challenges in underwriting

Surging submission volumes overwhelm underwriters

Inconsistent risk assessment impacts pricing accuracy

Manual triage consumes valuable underwriting time

Difficulty prioritizing high-value submissions

Limited resources to scale with growing demand

## The solution: UW Assist by Visionet

An intelligent triage accelerator that transforms underwriting operations—empowering carriers and reinsurers to process faster, with precision.

## Core features:

### Smart triage

Automatically routes submissions for straight-through processing or manual review.

### Risk segmentation

Uses AI to detect low- and high-risk cases early, improving prioritization.

### Operational efficiency

Accelerates underwriting by reducing manual effort and improving throughput.

### Data-driven decisions

Enhances consistency and accuracy with real-time AI insights into risk profiles.

# Business impact

## Faster quote turnarounds

Delight brokers with quick, accurate responses.

## Lower underwriting costs

Automate repetitive tasks, freeing up underwriters for complex cases.

## Improved risk selection

Avoid unprofitable risk while capturing high-potential business.

## Scalable operations

Handle peak volumes without scaling headcount.

## Real-world impact

“ A major reinsurer reduced manual underwriting by 40% using UW Assist to automate submission triage and risk categorization. ”
